

We have identified an error in the 2025 AUP-B activity. Please see the details below.

This error does not impact your ability to complete the activity and receive credit.

We apologize for any confusion.

Minisymposium

I. Knowledge Check Question 1 Feedback

The feedback displayed for Knowledge Check Question 1 in the Minisymposium, referring to “retroperitoneal sarcoma”, is incorrect.

It should read: “Involvement of at least one umbilical artery represents stage 2 of the fetal inflammatory response (**Image 1A**). Subchorionitis and involvement of the fibrous chorion represent stage 2 of the maternal inflammatory response (**Image 1B**). In both cases the neutrophilic infiltrate is grade 2.”
