

TABLE OF CONTENTS

Blood Parasites

Blood Parasites	6
Quantifying Parasitemia	7
Comparison of Blood Parasite Sizes	8
Comparison of <i>Plasmodium</i> Morphological Forms by Species Forms	9
Characteristic Morphological, Clinical, and Epidemiological Features of <i>Babesia</i> and <i>Plasmodium</i> species	10
Thick Films of <i>Babesia</i> and <i>Plasmodium</i> species	11
<i>Babesia</i> species.....	12
<i>Plasmodium falciparum</i>	13
<i>Plasmodium malariae</i>	14
<i>Plasmodium vivax</i>	15
<i>Plasmodium ovale</i>	16
Trypanosomes: <i>Trypanosoma brucei</i> and <i>Trypanosoma cruzi</i>	17
Microfilariae, General.....	18
Morphological, Clinical, and Epidemiological Features of Microfilariae Found in Skin	19
Microscopic Head and Tail Features of Microfilariae Found in Peripheral Blood.....	20
Morphological, Clinical, and Epidemiological Features of Microfilariae Found in Peripheral Blood	21
Blood Parasite Mimic: Platelets.....	22
Blood Parasite Mimic: Howell-Jolly Bodies	23

Intestinal Protozoa

Intestinal Protozoa.....	26
--------------------------	----

Morphological Features of Intestinal Amebae (Listed in Order of Increasing Size)	27
Relative Size of Intestinal Amebae.....	28
<i>Dientamoeba fragilis</i>	29
<i>Endolimax nana</i>	30
<i>Entamoeba coli</i>	31
<i>Entamoeba hartmanni</i>	32
<i>Entamoeba histolytica</i> /E. <i>dispar</i>	33
<i>Entamoeba polecki</i>	34
<i>Iodamoeba buetschlii</i>	35
Morphological Features of Flagellates (Listed in Order of Increasing Size)	36
Relative Size of Intestinal Flagellates.....	37
<i>Chilomastix mesnili</i>	38
<i>Giardia duodenalis</i> (Also Known As <i>G. lamblia</i> , <i>G. intestinalis</i>)	39
<i>Pentatrichomonas</i> (Formerly <i>Trichomonas</i>) <i>hominis</i>	40
Morphological Features of <i>Blastocystis</i> , Ciliates, Coccidia, <i>Cryptosporidium</i> , and Microsporidia (Listed in Order of Increasing Size)	41
<i>Balantioides</i> (Formerly <i>Balantidium</i> , <i>Neobalantidium</i>) <i>coli</i>	42
<i>Blastocystis</i> spp	43
<i>Cryptosporidium</i> species.....	44
<i>Cyclospora</i> spp	45
<i>Cystoisospora</i> (Formerly <i>Isospora</i>) <i>belli</i>	46
Microsporidia	47
Relative Size of Coccidia and Microsporidia.....	48
White Blood Cells and Red Blood Cells	49
Charcot-Leyden Crystals.....	50

Helminths

Helminth Eggs and Larvae Detected in Stool	52
Relative Size of Common Helminth Eggs	53
<i>Ascaris lumbricoides</i>	54
<i>Clonorchis sinensis</i> , <i>Opisthorchis viverrini</i> , and <i>Opisthorchis felinus</i>	55
<i>Diphyllobothrium</i> , <i>Dibothriocephalus</i> , and <i>Adenocephalus</i> species (Broad Fish Tapeworms)	56
<i>Dipylidium caninum</i> (Double-Pored Dog Tapeworm)	57
<i>Enterobius vermicularis</i> (Pinworm)	58
<i>Fasciola hepatica</i> / <i>Fasciolopsis buski</i>	59
<i>Ancylostoma duodenale</i> , <i>Ancylostoma ceylanicum</i> , and <i>Necator americanum</i> (Hookworms)	60
<i>Hymenolepis diminuta</i> (Rat Tapeworm)	61
<i>Rodentolepis</i> (Formerly <i>Hymenolepis</i>) <i>nana</i> (Dwarf Tapeworm)	62
<i>Paragonimus</i> species (Lung Flukes)	63
<i>Strongyloides stercoralis</i> Larvae	64
Differentiation of <i>Strongyloides stercoralis</i> Larvae From Hookworm and Free-Living Larvae	66
<i>Schistosoma japonicum</i> and <i>S. mansoni</i>	67
<i>Taenia</i> species (Beef and Pork Tapeworms)	68
<i>Trichuris trichiura</i> (Whipworm)	69
Helminth Egg Mimics: Pollen and Mushroom Spores	70
Helminth Egg Mimics: Beaver Bodies and Starch Cells	71
Helminth Larvae Mimics: Plant Hairs	72

Macroscopic Worms

Macroscopic Worms	74
-------------------------	----

Commonly Submitted Worms and Mimics (Listed in Order of Increasing Size)	75
Relative Size of Intestinal Nematodes.....	76
Anisakids: <i>Anisakis</i> , <i>Pseudoterranova</i> , and <i>Contracaecum</i> species	77
<i>Ascaris lumbricoides</i>	78
<i>Diphyllobothrium</i> , <i>Dibothriocephalus</i> , and <i>Adenocephalus</i>	79
<i>Dipylidium caninum</i>	80
<i>Enterobius vermicularis</i> (Pinworm)	81
<i>Necator americanus</i> and <i>Ancylostoma duodenale</i> (Hookworm)	82
<i>Taenia</i> species (Beef and Pork Tapeworms).....	83
<i>Trichuris trichiura</i> (Whipworm).....	84
Nonpathogenic Worms: Earthworms and Horsehair/Gordian Worms.....	85
Parasite Mimics: Mucus Strands.....	86
Helminth Mimic: Bean Sprouts	87
Helminth Mimics: Banana "Seeds", Citrus Juice Sacs, and Onion.....	88

Miscellaneous Specimens

Miscellaneous Specimens	90
Most Common Parasites by Specimen Type	91
<i>Echinococcus</i> species.....	92
Free-Living Amebae	93
<i>Leishmania</i> species	94
<i>Sarcoptes scabiei</i>	95
<i>Schistosoma haematobium</i>	96
<i>Trichomonas vaginalis</i>	97
Miscellaneous Parasite Mimics: Uric Acid Crystals and Detached Ciliary Tufts.....	98
Index.....	99
