

We have identified three errors in the 2026 AUP-A activity. Please see the details of each below.

**These errors do not impact your ability to complete the activity and receive credit.**

We apologize for any confusion.

## Case 4

The fourth paragraph on page 31 includes an incorrect spelling of “Takotsubo cardiomyopathy.”

## Case 5

### I. Thought Provoking Question 2

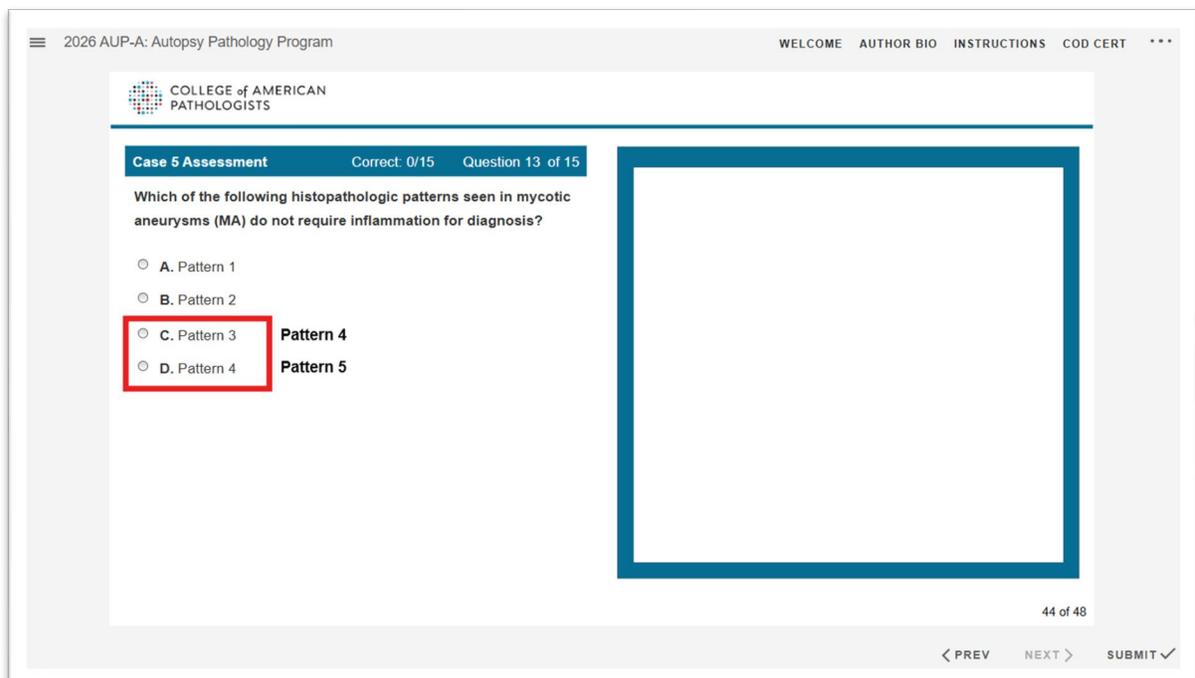

Thought Provoking Question 2 currently reads: “What are the pathological characteristics of retroperitoneal liposarcoma?”

It should read: “How do MA present clinically and what imaging modalities are utilized to diagnose them?”

The Case 5 PDF that can be downloaded on the Resources section of the activity is accurate.

### II. Assessment Question 13

Answer Options C and D in the answer list are incorrect. They currently show Pattern 3 and Pattern 4, respectively. Option C should be Pattern 4 and Option D should be Pattern 5, as below.

2026 AUP-A: Autopsy Pathology Program WELCOME AUTHOR BIO INSTRUCTIONS COD CERT

COLLEGE of AMERICAN PATHOLOGISTS

Case 5 Assessment Correct: 0/15 Question 13 of 15

Which of the following histopathologic patterns seen in mycotic aneurysms (MA) do not require inflammation for diagnosis?

A. Pattern 1

B. Pattern 2

C. Pattern 3 **Pattern 4**

D. Pattern 4 **Pattern 5**
